## The ang- axte eg ation

If $X$ is a non- mpt $s t$, a $s$ t-th or trali $\mid \mathbf{t i n}$ of th ang- axt in quat'on $r$ : $X \quad X$ ! $X \quad X$ 's a map sush that th of ll-known maide ation

$$
r_{1} r_{2} r_{1}=r_{2} r_{1} r_{2}
$$

's sat'sf: $d$, wo i $r_{1}=r$ idrthat

In pait'rulai, if $X$ 's a st, $r: X \quad X!X \quad X$ is a solut'on and $a ; b 2 X$,

So utior of $t i$ arg-saxt i quatior
iefly the state-ofl-the-a t l)

In 1 Et'ngof, Sih dl i and Solowis, Gat sa-lsanosia and Van d n igh

So utior of ti arg-zaxt i quation
iefly the state-oflthe-a t I)
